

## Providing Technology Services to improve Network, Application, and Data Management.

Based in Texarkana, TX, DataCast, Inc. provides a broad array of technology services tailored to small and medium-sized businesses. Operating a Secure Data Center as our hub, and delivering productivity enhancement software solutions, we help companies improve network, application, and data management .

DataCast Inc. was founded in 2006 by former executives and co-workers in the pharmaceutical distribution industry. Utilizing experience gained from operating a technology-focused, multi-billion dollar company, DataCast brings a common sense, cost-effective approach to managing technology. Operating a state-of-the-art, Secure Data Center as its hub, DataCast offers a full range of IT services to small and medium-sized business to assist with Network, Application, and Data Management.

### Managed Services

Bundled services, at our most competitive rates , tailored to your environment. With DataCast Managed Services, your hardware and network infrastructure are monitored 24/7, reducing system downtime and improving overall network performance.

**Increase Efficiency** within your organization.

**Improve Communication** with your Business Partners.

Use of **workflow technology** is proven to increase efficiency within an organization. DataCast's R3B2B Portal is a Business-to-Business (B2B) network that utilizes workflow technology to facilitate the tracking of tasks and activities among business partners. Reduce paperwork, create audit trails, improve and standardize processes.

### Secure Data Center

Brought online in 2001, our Secure Data Center previously served as the nerve center for a multi-billion dollar pharmaceutical distribution company. Constructed to protect against the physical forces of nature, our Data Center offers an ideal environment for Data and Application Security. Your critical business data is protected, encrypted, and accessible 24/7 via the internet .
